

10th Workshop on Crystalline Silicon Solar Cell Materials and Processes: Extended Abstracts and Papers

Filesize: 3.71 MB

Reviews

*Complete guide for ebook fans. Better then never, though i am quite late in start reading this one.
Your life span will likely be convert when you full reading this ebook.

To download **10th Workshop on Crystalline Silicon Solar Cell Materials and Processes: Extended Abstracts and Papers** eBook, please access the button below and download the document or get access to additional information that are related to 10TH WORKSHOP ON CRYSTALLINE SILICON SOLAR CELL MATERIALS AND PROCESSES: EXTENDED ABSTRACTS AND PAPERS book.

Bibliogov, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.The 10th Workshop will provide a forum for an informal exchange of technical and scientific information between international researchers in the photovoltaic and non-photovoltaic fields. Discussions will include the various aspects of impurities and defects in silicon-their properties, the dynamics during device processing, and their application for developing low-cost processes for manufacturing high-efficiency silicon solar cells. Sessions and panel discussions will also review thin-film crystalline-silicon PV, advanced cell structures, new processes and process characterization techniques, and future manufacturing requirements to meet the ambitious expansion goals described in the recently released U.S. PV Industry Roadmap. The Workshop will also provide an excellent opportunity for researchers in private industry and at universities to recognize a mutual need for future collaborative research. The three-day workshop will consist of presentations by invited speakers, followed by discussion sessions. In addition, there will be two poster sessions presenting the latest research and development results. The subjects to be discussed include: solar cell processing, light-induced degradation, gettering and passivation, crystalline silicon growth, thin-film silicon solar cells, and impurities and defects. Two special sessions will be featured at this workshop: advanced metallization and interconnections, and characterization methods.
