

# The Theory and Practice of Lettering; Designed for the Use of Engineers and Draftsmen Generally But Especially for the Use of Students in Engineering

---

By Christopher Elias Sherman

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1904 edition. Excerpt: .correct shapes as given in plate I, should be carefully noted. P is similar to the corresponding portion of B, with the exception that stroke 3 in P is a trifle below the middle. Stroke 5 is first made vertical and straight and then rounded at each end into 4. B. The lower lobe is about i unit wider than the upper. Strokes and 7 are made straight verticals at first and then rounded into 4 and 5; but these two stems must be joined by hairlines. This remark applies also to the R following. The effect of running the two curved stems together is shown in the first B, and is a mistake commonly made. D. Its width is determined as in all the previous letters, by first drawing a square and reducing this by the correct amount. Make stroke 4 a vertical...
